The purpose of this amendment is to modify the Proposed Order to not approve Staff's proposed alternatives 2 and 3 and to approve only alternative 1, but decrease the proposed monthly meter reading charge from \$20 to a \$5 monthly charge for customers who opt out of AMI metering.

Commission Discussion

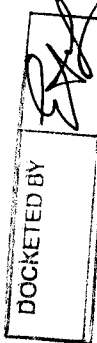

17. Although we appreciate Staff's analysis and recommendations, we do not find that Staff's alternative proposals 2 and 3 are appropriate under the circumstances presented in this matter. We are concerned that both Staff's alternative proposals 2 and 3 could result in opt out customers potentially providing inaccurate and untimely information concerning opt out customer usage.

18. We find that Staff's alternative proposal 1 provides both APS and its opt out customers with the most accurate and timely information concerning customer usage. However, in considering the Staff's proposed charge of \$20 per month for meter reading, we find that a more appropriate balancing in the public interest results in a determination of \$5 per month for meter reading for those customers who choose to opt out of AMI metering.

19. We find that it is appropriate to take judicial notice of Docket No. E-00000C11-0328 and to consider the matters reflected therein, as we evaluate APS's application for an AMI metering opt out tariff.

20. Based upon the information in Docket Nos. E-00000C11-0328 and E-01345A-13-0069, we further find that APS's AMI meters comply with the applicable federal standards.
